

# Electrical Testing Service

The law requires that all businesses must have all their electrical appliances and circuits regularly inspected and tested – the cost of this can range from a few hundred pounds for a small business to thousands for a major manufacturer. To reduce the costs for members and subscribers, the Association has reached agreement with Necta, a specialist testing service, that means that they can claim a discount off their quoted charges for providing this service. Even if you already use Necta you can claim the discount! They also provide training courses and other services. To get a quote simply complete this form and fax it to Necta. on **01709721212**
